EDUCATION

University of Northern Philippines

Cum Laude | Graduated: May 2026

Bachelor of Science in Information Technology

SKILLS

Languages	JavaScript, TypeScript, Python, SQL
Frontend	React, HTML, CSS, Tailwind CSS, Vite, Responsive Web Design
Backend & APIs	Node.js, Express.js, FastAPI, REST APIs
Generative AI	Google Gemini API, Prompt Engineering, Context-Aware Prompting, LLM Response Validation
Data & Cloud	Supabase, PostgreSQL, Prisma ORM, Firebase, Upstash Redis, Cloudinary
AI-Assisted Development	OpenAI Codex, Claude, ChatGPT, Google Gemini, Cursor
Developer Tools	Git, GitHub, Visual Studio Code, Vercel, Render

EXPERIENCE

Web Developer (Internship)

January 2026 - April 2026

CSA Business Consultancy

- Maintained and enhanced company web applications, including Tiendaan.com online shop, SenyoritaDulce.com, and IlocosFoodProducts.com, implementing design and feature updates across multiple websites.
- Managed website content and performed functional testing to identify issues and ensure updates worked as intended.
- Supported ongoing website improvements while gaining hands-on experience working with production web applications in a professional environment.

PROJECTS

I-Nelory: Personal Memory Journal | Full-Stack • Generative AI • Natural-Language Search

React • TypeScript • Node.js • Express.js • PostgreSQL • Prisma • Cloudinary • Google Gemini API

- Built a full-stack personal memory platform with REST APIs, authentication, PostgreSQL data management, and cloud-based photo and video storage.
- Integrated Google Gemini to enable natural-language memory search, allowing users to retrieve stored memories through conversational queries.

IntelliCLIQ: B-Hive Cafe Ordering Application (Capstone Project) | Full-Stack • Generative AI • Smart Recommendations

HTML • CSS • JavaScript • Node.js • Express.js • Firebase • Google Gemini API

- Built and deployed a full-stack café ordering application with menu browsing, cart and checkout, real-time order tracking, account management, and administrative functionality.
- Integrated a Gemini-powered Smart Search and recommendation system that interprets customer preferences and recommends relevant menu items through natural-language queries.

Nelume: AI Career Assistant | Generative AI • LLM Integration

React • TypeScript • Python • FastAPI • REST API • Google Gemini API • Upstash Redis

- Built a full-stack Generative AI career assistant for resume analysis, ATS-friendly cover letter generation, and personalized career and interview guidance.
- Developed Gemini-powered conversational features alongside resume analysis tools for ATS scoring, skill matching, grammar, and wording evaluation.
